

## TECHNICAL SKILLS

---

### Software Skills

- **Web & API Design:** Django REST framework, Bourbon framework, CSS3, HTML5, JavaScript, jQuery, Sass, Heroku.
- **Database:** Designed and implemented databases with SQLite and PostgreSQL.
- **Data Science:** Manipulation of data using third party libraries such as Matplotlib, Numpy, pandas, and D3.
- **Agile methodology:** Used Waffle.io and Trello for milestone sprints and keeping track of issues, bugs, and fixes.
- **Version control:** Used Git and GitHub to maintain applications on branches separate from the master branch.

## WORK EXPERIENCE

---

### *Python Web Developer*

#### Versus.live

**Oct 2015 – November 2015**

**Durham, NC**

- Created a web app with three other Python students using a Django REST API that can create brackets through Data Driven Documents (D3) for a wide number of competitors on-the-fly at a variety of venues.
- Used the Bourbon framework, SASS, HTML5, and JavaScript to style the web app to create an enjoyable user experience.

### *Assistant State Auditor, Financial Audit Division*

#### NC Office of the State Auditor

**June 2014 – November 2014**

**Raleigh, NC**

- Performed audits and assessments on functions, processes, and general controls for the NCDOT.
- Investigated laws, rules and regulations pertaining to OMB-A133 for DOT's CAFR for Formula Grants for Rural Areas and Federal Transit to make sure funds were allocated under proper guidelines.

### *Graduate Assistant, Information Systems & Mgmt Dept.*

#### University of North Carolina at Wilmington

**August 2012 – May 2014**

**Wilmington, NC**

- Collected data on U.S. college business major requirements for the Cameron School of Business and sister schools.
- Performed research on hypothetical manufacturing costs based on several years' worth of student input.

### *Lab Technician – Genome Sciences*

#### Duke University

**Summers 2006 & 2007**

**Durham, NC**

- Performed RNA extractions to consistently and accurately maintain contaminant-free lung cancer cell lines.

## EDUCATIONAL EXPERIENCE

---

### *Data Science with Python*

#### The Iron Yard, Cohort 5

**Graduated November 2015**

**Durham, NC**

- Spent 60 - 85 hours a week learning, as well as implementing, data science & web development technologies in back-end and Python-focused projects over a twelve week period.

### *Master of Science (M.S.), Accountancy*

#### University of North Carolina at Wilmington

**Graduated July 2013**

**Wilmington, NC**

### *Bachelor of Science (B.S.), Economics*

#### East Carolina University

**Graduated July 2009**

**Greenville, NC**

## ENTREPRENEURIAL EXPERIENCE

---

### *Developer, SPARKey*

#### Triangle Startup Weekend

**February 2016 – Present**

- Helped create an interactive application to benefit young students of all socioeconomic backgrounds in closing the career exposure gap; placed second out of all teams.
- Created mockups of mobile app pages using Proto.io and worked on development/content-validation teams.
